How it works →

How it works

Kermode helps you build crucial digital literacy skills using cutting edge page analysis technology, Inquiry Based Learning, and projects/lesson plans developed by incredible educators.

1 Copy and paste URL

Copy the web address you want to evaluate and paste it into "Website URL" field at the top of the KERMODE evaluator page.

2 KERMODE analyzes the page

Our innovative software analyses the page for over 20 different elements to assess for accuracy, bias, and timeliness. Based on that analysis, you will see a series of graphics, inquiry questions, and explanations that will help you determine whether this is a good source of information or not.

3 Answer questions and record thinking (Interactive Version)

With the interactive version, users will be able to answer the interactive questions and share their work with teachers, parents, colleagues or friends.

4 Save time with focused instruction (Interactive Version)

KERMODE is available 24/7 to facilitate strong research skills, answers common digital literacy questions, and help teachers highlight gaps in student knowledge to support focused instruction and save time.
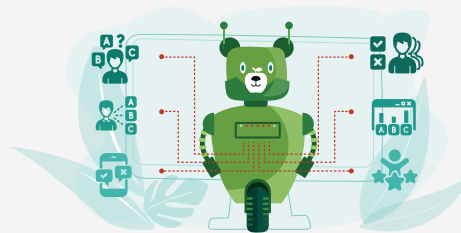

5 Use your new skills

Get out there and think critically, collaborate, laugh, cheer, and celebrate because now you're ready to take on the world as a well informed digital citizen!
